Concept Narrative: breaking through the pixel glass ceiling

During her transformative journey, our protagonist encounters a diverse array of challenges that she must overcome, contributing to her continuous self-development. This narrative serves as a poignant reference to the determination of women often overlooked in male-dominated industries. It underscores the resilience and strength of female characters who navigate their paths with mindful independence, challenging societal norms and paving the way for further empowerment.

Mindfully constructed and intricate detailed garments but with playful shapes and colours.  
Outfits worked through layering and highly accessorised.

# COLOUR PALLET

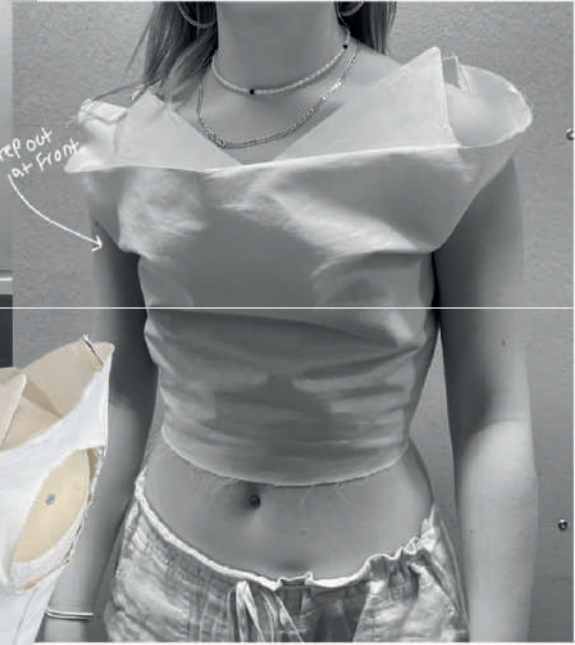

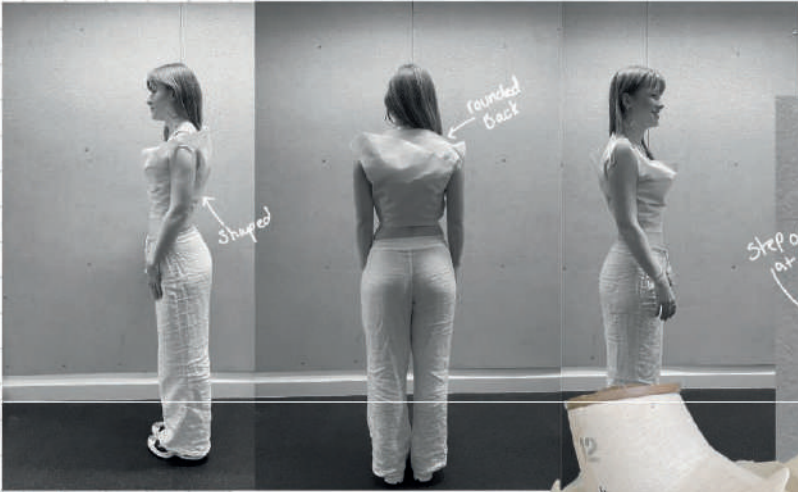

Collages created from curing and ranging previous stand work to inspire new and innovative shapes and silhouette. This has really helped me create a mood and aesthetic for the rest of the collection.

Geometric top

Inspiration from initial collage

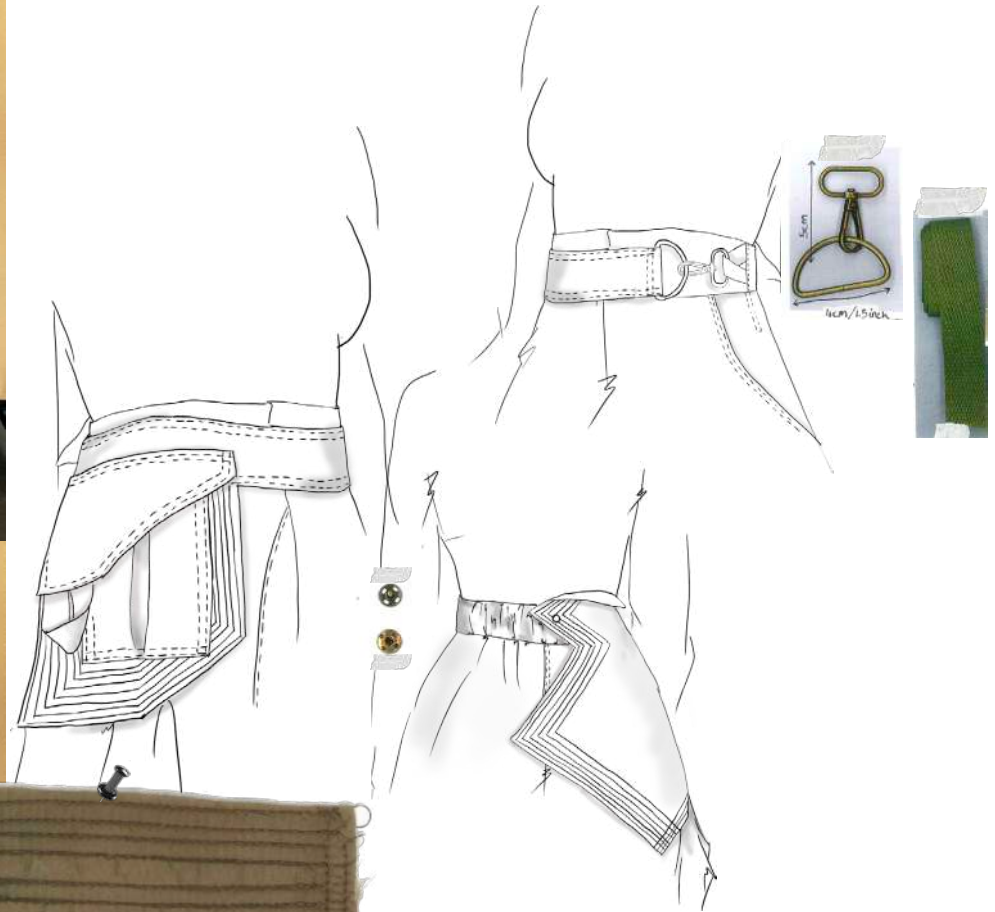

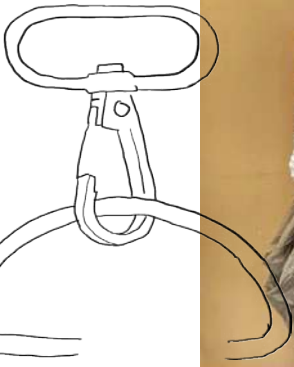

Structure built in paper

Geometric pattern cutting, to hold form. Through intricate pattern cutting, I was able to create a neckline that holds structure but still looks soft and delicate.

Asymmetric trouser design.

Detachable pocket bag, with stitching details. Hook and D-ring fastening on the side.

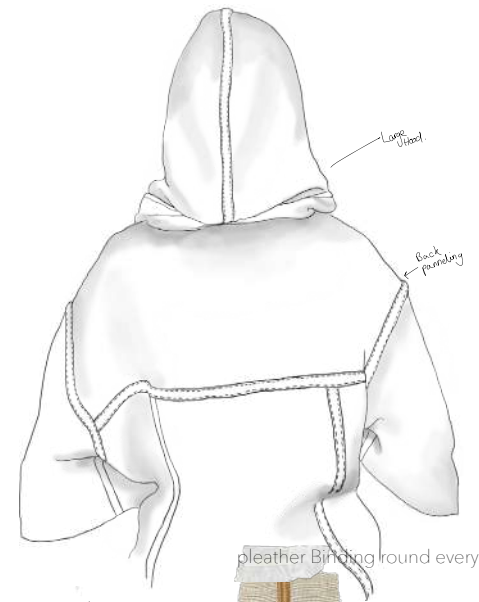

padded nylon for whole pocket

Open weave fabric sourced from charity shop curtains.
