ICELATION

Icelation is a collection about loneliness and winter. It is about deep loneliness everyone experiences throughout life in different ways, like having no friends, the loss of a loved one, heartbreak, or the feeling of never fitting in.

Winter is often a time when people isolate themselves more, the coldness and the darkness can make you feel alone and hopeless, winter depression is a common problem for those who experience long winters. Taking inspiration from snow and ice, I focused on wool fabrics in all white to create isolation from the cold and give a sense of comfort with the soft wool fabrics. The vision is to make people feel something and speak for the loneliest people in this world by creating an experience that would make an impression.

I know you are alone, but I see you.
